

# Global Energy Security Forum

School of International and Public Affairs  
Florida International University

## Test Drive the Chevrolet Volt

**FRIDAY, OCTOBER 29, 2010 | 9:30 AM - 11:30 AM**

Florida International University  
Parking Lot #5 | Modesto A. Maidique Campus  
11200 SW 8th Street, Miami

The Global Energy Security Forum in FIU's School of International and Public Affairs, in collaboration with General Motors, invites FIU students, faculty and staff, as well as the South Florida community, to be among the first in the country to test drive the much anticipated Chevrolet Volt. The visit to FIU is part of the "Volt Unplugged" tour, in which a caravan of Chevrolet Volts will travel 3,400-miles cross-country visiting a dozen cities across the U.S. and showcasing how easy it will be to live with the world's first electric vehicle with extended-range capability.

Trent Warnke, Volt Development and Validation Engineer, will be on hand to discuss the one-of-a-kind characteristics of the Volt and provide unique insights into the development and future of the vehicle.

**Please note that only individuals who are 21 years of age with a valid driver's license will be eligible to test drive the vehicle.**
