

# Global Energy Security Forum

School of International and Public Affairs

Florida International University

Florida Network for Global Studies International Business Summit

## Preparing Small and Medium Size Business Enterprises for a Green Energy Future

**WEDNESDAY, MARCH 23, 2011 | 8:00 AM - 3:30 PM**

FIU Modesto A. Maidique Campus | MARC Pavilion | 11200 SW 8th Street, Miami

The conference goal is to bring together a range of stakeholders with an interest in expanding Florida's renewable energy sector, attracting investment to it, and promoting its technologies and products to the Caribbean and Central American region. Entrepreneurs, business leaders, technology developers, investors, government agencies, and the general public will convene at FIU to hear the latest national and international developments in energy generation and to see what Florida companies have to offer in green energy products and services. Florida's historically close ties to the region make the State an ideal launching pad for renewable technologies that can benefit the entire Western Hemisphere.

The conference is part of a grant from the U.S. Department of Education Business and International Education Program being implemented by the Florida Network for Global Studies (FNGS). FNGS member institutions are Florida International University, University of Florida, University of North Florida, University of South Florida and University of Central Florida.

Conference is free and open to the public. For more information or to RSVP, call 305-348-7663.
